

Cost Per Mile Calculation for the Capitol Hill Car Rental

Car Class	Compact	Standard	Full-size	Minivan	SUV	Large SUV	Pick Up Truck	Cargo Van	Passenger Van
Average MPG	27.3	23.9	23.9	18.5	18.3	15.3	16	13.7	13.3

Capitol Hill Fuel Charge Validation Process

1. Divide the average MPG (provided above) for the selected car class into the cost per gallon of fuel. The average gallon of gas is taken from <http://gasbuddy.com/> for the Atlanta area (30334) during the week. Your answer will be the cost per mile.
2. Multiply the cost per mile times the number of miles driven during the rental.
3. Result is the approximate fuel charge for your rental.

Information Source

Average miles per gallon are derived from www.fueleconomy.gov for the typical car class in the Enterprise Car Rental fleet.
